

Sandel B2B e-commerce web packages

The Sandel B2B solution from Sandel Overseas Ltd provides all the functionality you need to enhance your web presence and grow your B2B e-commerce revenues.

Choose one of our four web packages to meet your online needs and ambitions: Trade Today; Professional; Enterprise; or Corporate+

Trade Today B2B Package

For: Small and medium businesses who want to show they take e-commerce seriously.

With a few clicks your business can create a website based on a range of templates and can be trading online the same day.

This package includes:

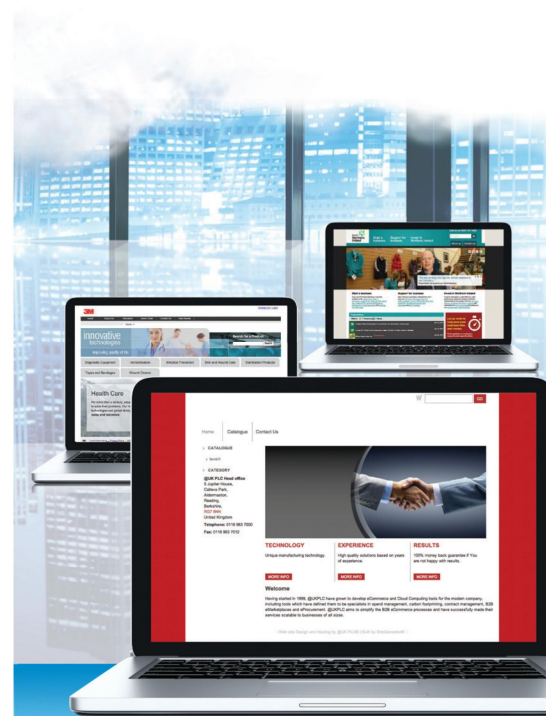

- Simple website set up from templates, with 500MB library space
- Ability to sell products and services online – and process inquiries, orders, invoices and payments
- Upload of existing product catalogues
- Ability to upload multiple images per product and service
- Updates to catalogues, prices and stock, instantly reflected to buyers
- Secure shopping basket and checkout
- Option to take payment by credit card, cheque or on account
- Full line item detail and tax breakdown on orders and invoices
- Ability to flip an order into a matching e-invoice
- Sales reports
- Hosting that supports payment security standards (PCI DSS Level 1)
- A website preview environment
- Redirects from previous sites and visitor tracking
- Increased visibility of your site with automatic search engine optimisation

Professional B2B Package

For: Businesses wanting more control and capabilities to differentiate themselves from the competition.

This packages includes: Everything in the 'Trade Today' package plus bespoke design for your e-commerce website; up to 5GBs of library space; tailored views and pricing for different customers; multi-currency support; ability to bundle items into packages; customised search, links and buttons; enhanced on site marketing including image galleries, presentations, slideshows and Twitter-feed; ability to sell downloadable products like e-books.

Choose one of our four packages to suit your organisation's size, needs... and growth plans

Enterprise B2B Package

For: Organisations needing more support for sophisticated customer and community needs.

This package includes: Everything in the 'Professional' package plus your own website domain; bespoke development; custom CSS and JavaScript support; up to 50GBs of library space; login via social media user id; content targeted to different countries and users; predictive search; customised basket and check-out; micro-sites; communities & forums; user reviews and ratings; link to an ERP and other business systems; an assigned Account Manager and Service Delivery Manager.

Corporate+ B2B Package

For: Organisations demanding world-beating e-commerce capabilities

Talk to us to discuss how the full functionality can meet your specific global web and e-commerce needs, and how your online presence links back into your organisation's complex multi-divisional structure, business processes and systems. You'll be assigned a dedicated Account Manager, Technical Account Manager; Service Delivery Manager and Development Team to ensure your project is a success.

What makes the solution different:

- supports web sites for all types of interactions, including citizen to government, consumer to business and business to business relationships
- provides a secure B2B payment process as standard – with payments direct to your account
- handles sales of both goods and services – with multiple pricing options
- supports complex global e-commerce, handling multiple languages, pricing, and taxes, with links into a growing number of e-marketplaces around the world

Join marketplaces round the world

Sandel B2B solutions power an increasing number of marketplaces and private purchasing portals. With a website built on cloud, you can make updates once via your site and push information, such as product details and pricing, out to one or more marketplaces, with no extra effort. This will connect your business with more potential customers and suppliers – increasing revenue opportunities and driving down costs.

Visit www.sandeloverseas.com to discover the latest list of marketplaces and to see which your organisation is eligible to join.

Sandel B2B will enable you to take your web presence to the next level. Sandel B2B provides a seamless e-commerce process from your website all the way through to the payment hitting your bank account – all powered by the integrated B2B solution.
